VACATE VALVES

- Simple installation drain valve alternatives for the OEM drain plugs in models listed
- Machined from 6061 aluminum and clear anodized for corrosion protection
- Vacate Valves operate on the same principle as the Blowision One Way valves, using the forward motion of the watercraft and gravity to allow ingested water to simply vacate the hull in one direction only
- Direct threaded replacements for the flimsy OEM plastic drain plugs, the Vacate Valve also simplifies interior flushing of the engine compartment
- Fits any model, by brand, that has a screw-in drain plug

IMPELLERS

- Constructed of ultra high-strength, corrosion-resistant stainless steel
- Exclusive hub-end water seal keeps the nasty stuff out of precious parts
- Mirror-smooth finish and polished hub resists cavitation
- Impeller pitch is determined by casting, not bending

CONCORD: THE POWER TORQUE SERIES

- This unique impeller enhances all-range maneuverability with no slippage in water hookup
- Variable pitch offers both low-speed torque and all-out high speed in one impeller

DYNAFLY: MAXIMUM ACCELERATION

- Blade geometry designed specifically for high compression ratio jet-pump systems
- Improve acceleration and top end while eliminating performance holes
- Lower pitch angle is recommended for stock motors; higher pitch angle is recommended for modified motors; lower pitch angle can also be used with modified motors if improved acceleration is desired

TWIN: STATE-OF-THE-ART DESIGN

- Specially for Yamaha SHO, SHO FRZ and FZS models, the twin series features the latest advances in high-performance impeller design

NOTE: Choose impeller based on level of engine modification: Stock, Limited or Modified. See appropriate columns in chart.

X-PROP: HIGH SPEED AND ULTIMATE PERFORMANCE

- X-prop series impellers produce the most powerful propulsion in the water from an advanced design that incorporates a high-compression hub and cambered blades

SUPER CAMBER

- Grunt and speed from one impeller
- The blade has a variable pitch, designed to give both strong low-end thrust and unmatched top-end performance
- Race, tow waterskiers and carry multiple passengers with ease
- A- and B-series offer a cost-effective solution and features both low-speed torque and all-out high speed in one impeller
- I-, J-, K- and S-series feature a proven impeller design with increased blade surface and smaller hub for more power and volumetric flow making them the best all-around impellers on the market

SUPER CAMBER NOTATION: In the application chart, Super Camber impellers are listed in the format "Super Camber (x/y/z)." This denotes the Solas series for the Stock, Limited and Modified impellers respectively. "Super Camber (I/J/K)," for example, means that the Stock impeller listed is "I" series, the Limited is "J" series, and the Modified is "K" series.

NOTE: Lower pitch impellers recommended for high altitude, pulling or freestyle applications.

THE DESTROYER

- When it comes to performance, these impellers are state-of-the-art
- Unique 3-D blade design was developed using the latest hydrodynamics research
- Blades have a super-progressive pitch and minimal overlap for hard acceleration throughout the powerband and increased top-end speed
- 3-D design reduces cavitation in all water conditions
- Precision-cast using aerospace-grade stainless steel, then heat-treated, CNC-machined and dynamically balanced
- Application chart is based on level of engine modifications; stock, limited (some bolt-on parts added) or modified (extensive engine/head work)
- If more than one PART # is listed in a column, the first is the recommended application, and the second is for those seeking maximum performance gains

AQUAVEIN INTAKE GRATES

- Maximize water flow and pump efficiency
- No more slow acceleration, bouncing, sliding, rough turning or mediocre top-end
- Patented dual-wing technology feeds water into the pump's entryway so air won't get trapped in the pump and cause cavitation
- Deep side rails help channel water and force-feed the wing area while turning

TUBBIE DESTROYER SPONSONS

- Constructed specifically with the aggressive racer and freerider in mind
- Built and shaped specific to the unique hull shape of the SuperJet, the Tubbie Destroyer is fully removable with an average 10 minute per side install
- For racers shredding the stock class, the Tubbie Destroyers for the SuperJet allow the hull to sit slightly deeper in the water, while still giving the ski the well known benefits of the Tubbies aggressive turning, hook up and bow buoyancy, all without creating too much floatation and side to side instability at mid speeds
- Each set available in white gel coat and includes detailed installation instructions and all stainless and billet aluminum hardware

ENGINE KEEPERS

•Designed in conjunction with (and required by) Blowsion SXR Pro Freerider Air Darin Anderson and SL rider Joe Kenney; these "Kenney Keepers" are a must have for any hardcore surf or flat-water invert artist riding a Yamaha Super Jet
•Each set contains a left and right side front mount retainer and extended stainless hardware for installation
•Unique close tolerance design retains the front "top heavy" weight of the engine block from being flexed or thrown forward during flat out maneuvers or inverts
•Since this is a common occurrence even in flat water racing action, Blowsion designers also found them to be excellent insurance against ever having to replace those expensive engine mounts again
•Anodized blue for Yamaha or green for Kawasaki; each kit includes left and right contoured brackets and stainless mounting bolts

FLO
Oil Filters

**FLO STAINLESS STEEL,
REUSABLE "SPIN-ON" OIL FILTER**

- Made from laser-cut, medical-grade, 304 stainless steel micron filter cloth, this filter provides 200% more filter area in many cases
- Stainless filter catches items down to 35 microns, which is about three times better than most good paper or brass filters
- Unlike glued paper filters, the FLO Oil Filter pleat seam is welded and able to withstand up to 600 degrees
- Filters maintain consistent flow under all conditions including extreme heat, the presence of water, and cold start-ups where paper filters can flow so poorly that they often cause the bypass valve to open and allow unfiltered oil to enter your engine
- Should be the last filter an owner ever needs; this high tech filter technology is widely used in all types of auto racing including NASCAR, Indy type cars, Formula 1 and in the Aerospace industry where filtration is of the utmost importance

TURBULATOR

- Turbulators use a fixed-vane vortex design that turns your intakes into violent mixing chambers
- Add these vanes between the airbox and manifold to eliminate heavy droplets of fuel, fuel stacking and fuel puddling
- The result is no more load or dive spots; just crisp, clean throttle response throughout the powerband
- Complete atomization also increases fuel mileage and eliminates standoff

MOTOMINDER HOUR METER

- Automatically records and displays your engine's accumulated run time, so oil changes, piston, rings, valves, spark plugs, etc. can be serviced at the correct maintenance schedule
- Correct schedule saves costly engine damage from service neglect, but Motominder can also save money from servicing too frequently
- Powered by the vehicle's electrical system by simply cable tying its power line along the spark plug lead or direct connecting to the kill switch wire
- Smallest engine hour meter available (approximately 1 by 1.5 inches); doesn't require additional mounting brackets and can be easily mounted by the peel-and-stick method to the frame or other convenient area
- Records the installation date, and displays this briefly whenever the engine is started; on start-up it displays hours of runtime for 1 minute, flashes the runtime every 10 seconds while the engine is running and also displays runtime at power down for 2 minutes, so riders have plenty of time to get their helmets off before checking the display

IRIDIUM SPARK PLUGS

BETTER METALS MEAN BETTER SPARK PLUG DESIGNS

- Six times harder than platinum, Iridium doesn't melt in temperatures up to 4,000°F
- Because the Iridium electrodes of these plugs can be shrunk to only 0.4mm, voltage requirements decrease while firing performance improves
- 360° laser welding of electrode provides a seal that resists wear even in the worst conditions
- Ground electrode features a tapered cut and U-groove that form a large volume area for the flame's center
- Use NGK cross-reference chart to order and stock these plugs

E3 SPARK PLUGS

- Unique electrode shape maximizes the power created by the spark plug – Diamond Fire technology
- Electrode is a combination of performance and technology that results in an improved flame kernel shape
- This flame front ignites the bulk air/fuel mixture faster, moves heat into the combustion chamber faster and creates a more localized pressure front for faster pressure rise during the cylinder power stroke
- The result is more complete combustion and an improvement in engine performance
- A truly premium performance plug
- Sold each

tecMATE

3807-0052

IGNITIONMATE DUO

- Lightning-fast ignition diagnostic tool that displays and compares the ignition parameters of two cylinders or ignition systems simultaneously – on the same engine or on two like engines
- The power sport industry's top tool for trouble-shooting problems on all ignition systems (transistor, CDI, magneto, points)
- Precise and sensitive in measurement, yet robust and weather resistant
- Designed to find the failed part or bad connection on the vehicle – the tool pays for itself by virtue of the time saved in tracing the problem on the vehicle before disassembly/swapping out of parts
- Ignition signals are fast, high-voltage pulses of energy that can damage even a good digital multi-meter, whereas the IgnitionMate has been specially designed to measure and dynamically display both primary and secondary ignition signals on bright LED bar graph displays
- Allows direct comparisons of secondary coil voltage, secondary spark current, primary coil voltage/current, ignition peak voltage pulses, in-cylinder spark stability and intensity, or primary circuit voltages
- Dual low-tension leads and high-tension leads
- The instrument is powered by an internal rechargeable 1.5Ah NiMH battery; recharge the battery with any 12VDC source, such as a vehicle battery or 12VDC adapter
- Battery switches off after two minutes of no activity to conserve power
- Includes carrying case and necessary cable accessories

| DESCRIPTION | PART # | SUG. RETAIL |

3807-0187

IGNITIONMATE

- Compact dual-display peak-voltage ignition tester that makes trouble-shooting all types of spark ignition systems easier, surer and quicker
- Ignition signals can damage even a good digital multimeter – IgnitionMate is specially designed to measure and dynamically display both primary and secondary ignition signals on bright LED bar graph displays
- The power sport industry's top tool for trouble-shooting problems on all ignition systems (transistor, CDI, magneto, points)
- No disassembling of ignition components are required – this avoids accidentally introducing or correcting poor contacts in the system, which may further confuse and delay resolution of the unidentified problems
- Spark scale to measure the consistency of the high voltage current signal and to determine misfires; the signal strength can be varied for display purposes; spark strength of different cylinders can be compared
- The dual displays allow simultaneous measurement of two different ignition signals; this allows you to narrow down between which two points the problem lies
- The instrument is powered by an internal rechargeable 1.5Ah NiMH battery that provides 6 hours autonomy; recharge the battery with any 12VDC source, such as a vehicle battery or 12VDC adapter
- The standard kit includes the instrument with rugged rubberized protective and mounting holster, combination spark cable calliper pick-up with silicon lead, stick-coil adapter, silicon test lead set with insulated crocodile clips and Probulator back probes, 12VDC 2-meter (6'1/2") power lead and instruction manual & quick reference guide all packed in a custom carry case
