VENOM MOLOTOV & SOLIDS

In today's culture, tattoos canvas an individual's body, representing both their passions and personality. The Venom Molotov graphic was inspired by the tattoos found in rap-rock, punk, and alternative media, which portray everything from highly political to disturbingly social messages. The graphic artistry of the Venom Molotov draws you in but leaves you thinking about mortality, greed, good and evil, and the gamble of life. The Venom line of helmets not only look aggressive they are leaps ahead of the competition. Functional features include the wind tunnel tested aerodynamics along with a fog-free, locking shield to the molded base gasket with integrated ventilation. The Venom offers exceptional vision, great balance, DOT & ECE compliance, light weight and the meanest stance in the neighborhood. Imported.

MEN'S LEATHER GLOVES

Our wide range of styles allows you to choose the glove that's just right for the type of riding conditions you encounter. All our models are made of supple leather and accented with features that provide unrivaled comfort. On our six full-fingered models, we utilized gel padded palms to reduce road vibration for all day riding comfort. For riders who want the added protection and warmth of a glove without sacrificing the sensation and control of a bare hand, we have two new finger-less designs. We paid attention to the small details, such as leather pull loops on the finger-less models. Imported.
